5. MANAGEMENT AND DISCUSSION ANALYSIS

In view of the latest developments in the sugar market, Sugar Industry is hoping for a better return on the produce during the year 2014-2015. The Government have also realized the seriousness of the problem due to the failure of their earlier policies of controlling the sugar price, which consequently created cash flow problems and losses to the Sugar Industry. The price of cane has gone up in the last 3 / 4 years itself by Rs.700/- to Rs.800/- per ton whereas the sugar price was stagnating at Rs.2700/- to Rs.3000/- per quintal. From next year onwards, the prospects of getting bumper crop of sugar cane are very remote in view of the competition from hybrid maize, paddy, palm oil and other competitive commercial crops. Secondly for the last several years the international sugar market also was depressed because of over production. The sugar industry is cautiously optimistic regarding the sugarcane production and prospects for the next two to three years.

We are supplying organic manure to the cane growers with the product name as RR Biogold, which is rich in organic content with bio fertilizers, micronutrients etc. It can maintain soil structure and texture and also for reclaiming soils to control salinity and also improves water holding capacity of soil.

6. MECHANISED CANE CULTIVATION:

Implements like sub-soiler, rotator, cane planter, power tillers and whole cane harvester are being utilized in our research farm and some of the enthusiastic farmers are utilizing these implements in their farms. The cane harvester is resisted for two reasons. Spacing between the rows planted and ratoonability of the crop being damaged due to uprooting of the clumps by the machine causing yield loss.

TECHNICAL UPGRADATION:

We are conducting training sessions with scientists from sugarcane Research station for our field staff to update the knowledge.
